

## Family Search Memories – Audition – English

At FamilySearch, we believe connections to our family members-past-present-and future-can be a source of great joy that helps us understand our own personal identity and may even help us overcome some of our challenges in life. We want to help you save and share your family's memories before it's too late, and they disappear, never to be found again.

FamilySearch is a non-profit organization that started as the Genealogical Society of Utah in 1894. We provide FREE access to historical records from over 175 countries. With over 4 billion images, over 8 billion searchable names, and over 1 billion people in the Family Tree, we can help you find and connect to your family.
